Networking: DHCP • DNS • IP Configuration • LAN/WAN • OSI Model • Ping • TCP/IP • Tracert • VPN • Wi-Fi

ITSM & Incident Management: Escalation • Incident/Service Request Management • JIRA • Problem/Change Management • Root Cause Analysis • SLA Management

Systems & Tools: ITSM Platforms • JIRA • Microsoft 365 • PowerShell • Remote Support Tools • SQL • Windows Administration

Professional Experience

Concentrix Catalyst Private Limited

Gurugram, Haryana

Sr. Representative, Information Technology

Jan 2025 – Present

- Provide L1/L2 technical support to users, diagnosing and resolving hardware, software, operating system, application, network, connectivity, and access-related issues.
- Troubleshoot Windows 10/11, Microsoft 365, VPN, Wi-Fi, LAN, peripherals, applications, and endpoint-related issues to restore user productivity within defined SLAs.
- Manage incidents and service requests through JIRA/ITSM platforms, ensuring accurate categorization, prioritization, documentation, escalation, tracking, and closure.
- Perform structured technical troubleshooting by analyzing error messages, system behavior, configurations, connectivity, application issues, and user-reported symptoms.
- Investigate and resolve recurring technical issues through root-cause analysis (RCA) and coordinate corrective actions with relevant technical teams.
- Handle escalated incidents by collaborating with Network, Infrastructure, Application, IT Operations, and vendor support teams to drive issues through to resolution.
- Monitor ticket queues and proactively identify aging incidents, SLA risks, recurring issues, and unresolved technical problems to improve support performance.
- Assisted in policy updates, software rollouts, and onboarding processes, reducing setup time for new users by ~30%.

Concentrix Catalyst Private Limited

Gurugram, Haryana

Technical Representative - Content Strategy (TCF)

Apr 2024 – Dec 2024

- Managed system imaging, deployment, and remote device administration via BigFix, supporting 200+ endpoints across the organization.
- Develop troubleshooting documentation and operational runbooks that improve knowledge reuse, escalation quality, and support consistency.
- Analyze recurring incidents and support trends to identify opportunities for process improvement, knowledge enhancement, and reduction of repeat tickets.
- Support users with software installation, application issues, hardware problems, connectivity problems, access requests, and general IT service requests.
- Track incidents and documentation improvements through JIRA and Salesforce, supporting software installations, applications, hardware, connectivity, and access requests.
- Collaborate with cross-functional teams on complex application, connectivity, and infrastructure incidents, improving knowledge reuse and escalation quality.
